The Society is depending for its support on your contributions.

Please make your check to the order of George L. Shearer, Treasurer, and mail to Joseph D. Flick, Superintendent, 321 East 42nd Street, New York City.

## LEGACIES TO THE SOCIETY

The Society has always been greatly aided by this form of generosity. No precise words are necessary to a valid legacy to the corporation. The following form, however, may be suggested:

*"I give to the New York Society for  
the Relief of the Ruptured and Crippled  
the sum of*

*.....Dollars."*

## HOSPITAL FOR THE RUPTURED AND CRIPPLED

The New York Society for the Relief of the Ruptured and Crippled was organized March 27, 1863. Dr. James Knight and several of his friends were instrumental in forming an active Board of Managers, who served faithfully for many years. For three years Dr. Knight's home at 97 Second Avenue was the Hospital. 28 patients could be accommodated.

In 1867 the property on 42nd Street and Lexington Avenue was purchased and in 1868 plans for the new Hospital were begun. In November 1870 the new building with a bed capacity of 200 patients was occupied. The first year (1870-1871) 2,721 patients were treated.

Since the beginning of the Institution, a school has been maintained under the direction of the Board of Education. A kindergarten was also started a few years later. Today we have three teachers giving class instruction as well as bedside teaching for those unable to attend the class.

When Dr. Knight died in 1887 he was succeeded by Dr. Virgil P. Gibney, who had been appointed Surgeon-in-Chief in 1885 and continued as Surgeon-in-Chief until he resigned in 1924.

In 1898 a new addition was built doubling the floor space, with a well appointed Out-Patient Department.

In 1912 the Hospital again found new and larger quarters in the building in which we are now carrying on a much greater amount of work as may be seen by the following figures.

Total number of visits and re-visits in the Out-Patient Department in 1932.....	78,008
Total number of Hospital days for 1932.....	70,086
Total number of free days care given during the year 1932 .....	25,956
Total number of free cases treated in the Clinic during the year 1932.....	31,178

## CLINICS

Orthopedic          Daily 1-3 P.M.

Hernia              Daily 1-3 P.M.

Physiotherapy Department

Daily 9 A.M.-5 P.M.

Tuesday & Thursday 7-9 P.M.

Obesity Tuesday 6:30-8:30 P.M.

Thursday 9-10:45 A.M.

Arthritis

Tuesday & Friday 10-12 A.M.

Goiter (Thyroid)

Tuesday 2-3 P.M.

Dental Clinic—

Daily except Saturday

9:30.-11 A.M.

1:30-3 P.M.

Nose & Throat Clinic

Tuesday & Friday 12-2 P.M.

Varicose Vein

Thursday 10-12 A.M.

Bone Sarcoma

Wednesday 2-3 P.M.

*No Clinic on Sundays or Holidays*

SIXTY-NINTH ANNUAL REPORT  
*of the*  
BOARD OF MANAGERS OF THE NEW  
YORK SOCIETY FOR THE RELIEF  
OF THE RUPTURED AND  
CRIPPLED

FEBRUARY 9, 1933

To the Board of Managers,  
New York Society for the Relief  
of the Ruptured and Crippled.

Gentlemen:

During the year 1932 we took care of 3,679 patients. There were 78,008 visits to the Out-Patient Department and 2,167 patients were treated in our Emergency Room.

The cash receipts in 1931 were \$564,681.31, in 1932 the cash receipts amounted to \$441,275.71, a decrease of \$123,405.60.

The total operating expenses in 1931 amounted to \$703,946.53, in 1932 they amounted to \$546,153.80, a decrease of \$157,792.73. The expenses have been reduced in every Department as much as possible, without decreasing in any way the efficiency of the Departments, and giving to the patient the same care as in the past.

The Board of Managers is very thankful to the great number of contributors who have continued to give to the Hospital in these difficult times.

The thanks of the Board of Managers are due to the Social Service Committee, the Occupational Therapy Committee, Dr. William B. Coley, and to the members of the Staff who have cooperated loyally and given every effort to continue to make the work of the Institution successful.

The details of the work of the Institution is contained in the report of the Surgeon-in-Chief, and the different members of the Staff, and the details of the financial operations of the Institution are contained in the report of the Treasurer.

LAWRENCE MCK. MILLER,

*Secretary.*

## HOSPITAL STAFF

---

*Surgeon-in-Chief Emeritus*

WILLIAM B. COLEY, M.D.

February 9, 1933.

To the *Board of Managers*,

Hospital for Ruptured and Crippled,  
New York, New York.

Gentlemen:

The close of the year 1932 found institutions as well as individuals striving to hold their own against the overwhelming odds of a world-wide financial depression. All have had to retrench in every possible way. The Hospital for Ruptured and Crippled was no exception. Every department of the hospital was affected, some more than others. It is encouraging to note, however, the large number of patients admitted during the past year, i.e., 3,679. In the Out-Patient Department there were 78,008 visits and revisits made during 1932, as compared with 81,456 in 1931 and 100,345 in 1930.

In the three Orthopedic divisions combined, 1,594 operations were performed in 1932, as compared with 1,672 in 1931 and 1,878 in 1930.

In the two Hernia divisions, 1,021 operations (822 for hernia) were performed in 1932, as compared with 1,432 (1,090 for hernia) in 1931, and 1,647 (1,206 for hernia) in 1930.

The Physiotherapy Department under the direction of Dr. Hansson gave 58,137 treatments in 1932, as compared with 63,678 in 1931 and 62,626 in 1930.

The report presented by Dr. Snyder of the work done by the Arthritic Clinic during the past year is encouraging.

Likewise the number of deaths during the year 1932 showed an appreciable decrease, i.e., 45, as compared with 55 in 1931 and 69 in 1930. Most of these

deaths occurred in accident cases. There were 2,167 emergency cases admitted during the past year.

It is interesting to compare the figures compiled by the X-ray Department: the total number of patients radiographed in 1932 was 5,239 (6,350 in 1931 and 7,412 in 1930) and the total number of radiographs made in 1932 was 17,040, as compared with 24,974 in 1931 and 31,050 in 1930.

The work of the Laboratory under Dr. J. E. McWhorter, Director and Dr. J. E. Sullivan, Assistant Pathologist, was carried on most satisfactorily. During the past year 14,359 tests or examinations were made.

Dr. S. Perry Rogers who succeeded Dr. Sullivan as the Gibney Memorial Research fellow in 1931, has been conducting a clinical study of poliomyelitis, and other experimental work in connection with scoliosis, under the direction of Dr. Armitage Whitman and other members of the Orthopedic staff. He has become so much interested in his work that he has expressed the desire to retain the fellowship for another year.

In connection with the large number of bone sarcoma cases treated at our hospital during the past few years we have built up a fine museum of permanently mounted specimens obtained from amputations. These specimens have already proven of great value for teaching purposes.

A glance at the report of Mrs. William A. Agar, Chairman of the Ladies' Auxiliary Committee, and Miss Jessie H. Prest, Director of the Social Service, will show the large amount of work that has been performed by this department during the past year. During the past summer 284 patients were sent to 27 convalescent homes and camps.

The many tributes that are constantly being paid our Nursing staff speak well for the able management of Miss Ridley.

Taking all in all, the foregoing figures speak for themselves. That we have had to make retrenchments in every department is apparent. But that this has been accomplished without lowering the high standards of medical and surgical care of our patients is due largely to the skilful management and good judgment of our Superintendent, Mr. Flick; and for this the Medical Board feel greatly indebted to him.

In view of the increasing number of large medical centers here and in other parts of the country, the *raison d'être* of the voluntary private hospital is a question that is receiving more and more attention. It is generally conceded that the enviable reputation of our hospital is being maintained, and that it will continue to justify its existence in the future as it has in the past.

I believe it very important at the present time to consider seriously the question of formulating a general policy that might serve as a guide to our future development.

The question occasionally arises: Is the Hernia Department of the hospital any longer necessary when all general hospitals are performing hernia operations? All general hospitals in 1888 were performing operations for hernia but with results so poor that in 1890, Doctor Bull, in a report of 134 cases operated upon mostly at the New York Hospital (a general hospital) showed such a high percentage of recurrences, nearly forty per cent, that he questioned the propriety of using the term "radical cure" for operations for hernia.

He states: "In reflecting on these results, I am obliged to conclude that in these methods that I have faithfully tried, there is no prospect of obtaining a radical cure in any form of hernia. The majority of cases will be found to relapse if followed for a sufficient time. This experience will doubtless be dupli-

cated in cases yet to be traced; and goes to strengthen the conviction that all methods of radical cure will be found unsatisfactory."

So much for the results obtained at a general hospital. Seven years later, before the Buffalo Academy of Medicine (Feb. 2, 1897) I reported the results obtained in 360 operations performed at the Hospital for Ruptured and Crippled for the radical cure of hernia: there was only one death (.27 mortality), and 3 relapses (1.9 per cent); primary union occurred in 97 cases; there was no case of deep infection. One hundred and ten of the patients were adults. This report received a most flattering tribute from Lord Lister in an address delivered before the College of Surgeons in London in 1897.

Thus within the short space of six years the gloomy prophecies of Doctor Bull were shown to be without foundation; and the results obtained at the Hospital for Ruptured and Crippled justified the right to use the term "The radical cure of Hernia."

Our Hernia Department has retained its position of leadership in the operative treatment of hernia. Many surgeons have visited it for the purpose of becoming familiar with our methods. One, a leading surgeon of northern New York, recently wrote to one of our Attending Surgeons as follows: "Thank you for the opportunity to get a close-up of your clinic. Do you realize that your adoption of the Gallie and Torek operations has done more than their authors and a score of hospitals could ever have done to establish them as standards of surgical procedure? The profession owes your Clinic its appreciation for this most recent record, a worthy addition to the established leadership in the treatment of all forms of rupture."

While it is true that all general hospitals are performing operations for hernia, there is no operation in surgery in which a successful result depends more

upon the skill and experience of the surgeon than does the operation for the radical cure of hernia. So, I believe, the Hernia Department of the Hospital for Ruptured and Crippled has not only justified its existence in the past but has shown that the need for such a department will be just as great for a long time to come.

With the growing tendency on the part of all general hospitals to have an Orthopedic Department, the same question is asked about these cases: Is it necessary to have a special hospital for the treatment of orthopedic conditions? Most of the orthopedic departments of even large hospitals are comparatively small, and the staffs are limited in number. Practically all the great advances in orthopedic surgery during the past three decades have come from special orthopedic hospitals. Since the Great War there has been a steady tendency to refer all acute fracture cases to orthopedic surgeons, and at the present time the majority of fracture cases are being treated by them instead of by general surgeons as formerly, thus greatly enlarging the field of orthopedic surgery.

As to the broad question: "The future of the hospital;" it is extremely difficult for any one to prophesy about the future of any hospital, or, at the present time, about the future of Medicine itself. In 1876 Samuel Gross ventured to prophesy about the future of Surgery. He said that surgery had reached its acme and that little further could be expected in the way of improvement or discovery. Yet the next two decades saw the greatest advance of all time.

During the past ten years the Hospital for Ruptured and Crippled has made certain very definite advances:

1. It has established the first Arthritis Clinic in this country. This clinic has shown a steady increase in the number of patients treated.

2. It has established a physical therapy department which has grown so rapidly that it now equals that of any other hospital in the country.
3. It has installed a therapeutic pool—the third of its kind in the country—for the treatment of patients suffering from paralysis following poliomyelitis.
4. Under the auspices of the Gibney Memorial Fellowship, important research work bearing on the etiology of malignant tumors of bone, has been carried out.

At the present time the personnel of the medical staff includes a larger number of younger men of unusual ability and promise than it has at any previous time.

These are some of the reasons why I am optimistic about the future of the Hospital for Ruptured and Crippled. This feeling of optimism is still further strengthened by the knowledge that the Board of Managers has appointed as my successor such a distinguished surgeon as Dr. Eugene H. Pool.

It has caused me keen regret to send in my resignation after a continuous service on the staff of more than forty-two years. Such a connection is not easily severed. I appreciate highly my great privilege in having been able to work for so many years with such men as Gibney, Bull and Whitman, and during these later years to have enjoyed the close association of the members of the Board of Managers. Although relieved of the responsibilities of routine hospital work, I hope for some time to come to keep in close touch with the Hospital for Ruptured and Crippled, in whose welfare I shall ever retain the greatest interest.

Respectfully yours,

WILLIAM B. COLEY, M.D.

*Surgeon-in-Chief.*

## REPORT OF THE SUPERINTENDENT

To the Board of Managers,

Hospital for Ruptured and Crippled.

Gentlemen:

Due to economic conditions the year 1932 has been a trying one. Our operating receipts declined from \$564,681.31 on December 31, 1931 to \$441,275.71 on December 31, 1932, a decrease of \$123,405.60. To meet this decrease in operating receipts we had to cut down the expenses without decreasing the efficiency of the Institution, and still take the same care of the patient.

The operating expenses in 1931 were \$703,946.53, in 1932 the total operating expenses were \$546,153.80, a decrease of \$157,792.73.

To obtain these results all heads of Departments and the staff of the Hospital have cooperated earnestly and we are very thankful for their cooperation.

We treated 3,679 patients during the year, a total of 70,086 hospital days. In the Out-Patient Department we treated 78,008 patients. In addition, we treated 2,167 patients in the Emergency Room.

During the summer, through the courtesy of Mrs. Lyman Delano, 42 children were taken care of at Friendship Hall, Rhinebeck, N. Y. We are very grateful to Mrs. Delano for her continued interest.

More than 40 little patients were taken care of at Southampton during the summer, and the Board of Managers of said Institution is deserving of our gratitude for the good care taken of these children.

The cost per day of a ward patient was \$5.59 and the cost per visit in the Out-Patient Department was \$1.52.

The gift of the Library by Mr. Henry A. Alker is proving more and more valuable to the Hospital, and

the Library Committee deserves our thanks for the distribution of books to the patients.

The Institution is to be congratulated on having such friends as Mrs. William Church Osborn, Miss Blanche Potter and Miss Angelica Gerry, who refer children to us for treatment, and their generosity in paying for board and treatment of these children.

Thanks and appreciation are due to the ladies of the Church of the Incarnation, and the ladies of the Cathedral of St. John the Divine who save us many dollars in sewing, and gifts of clothing for the patients.

I wish to express my thanks and the thanks of the Board of Managers to the following for their cooperation for the care of our patients during convalescence.

Burke Foundation, White Plains, New York, in charge of Dr. Brush.

Blythedale Home, Valhalla, New York, through Dr. VanDerwerker, their visiting surgeon, also takes many of our children for convalescent treatment.

For the co-operation at all times, we wish to express our thanks to the Children's Aid Society of New York and Brooklyn.

Also to the following:

Camp Cheerful, Rotary Club of New York, Mrs. Goodhue Livingston, President. Children's Fresh Air Home, Southampton, L. I. Association for the Aid of Crippled Children and to all other agencies and individuals who have made through their co-operation the convalescent work possible, done by our Social Service Department.

The Social Service Department, the Occupational-Therapy Department and the Public School authorities have all cooperated with us to make the stay of the patients in the hospital a happy one.

Respectfully submitted,

JOSEPH D. FLICK,  
*Superintendent.*

## HOUSE SURGEONS AWARDED DIPLOMAS

DURING THE YEAR 1932

### *Orthopedic Department*

RICHARD TAYLOR HUDSON, M.D.  
MATHEW V. NORTON, M.D.

## REPORT OF THE ARTHRITIS CLINIC

FROM JANUARY 1, TO DECEMBER 31, 1932

I have the honor to submit the report of the Arthritis Clinic of the Hospital for Ruptured and Crippled for the term beginning January 1, 1932 and ending December 31, 1932.

This year was marked by a further increase in the severity of the financial depression in the City, and it was to be expected that a pay clinic such as the Arthritis Service of this Hospital would suffer markedly from this economic condition. However, comparison of figures for the past three years does not present such a gloomy aspect. In 1930 the total was 172 new patients and 1,610 revisits; in 1931 there were 230 new patients and 2,146 revisits, while in the period embraced by this report there were 173 new patients with a total of 2,026 revisits.

This drop in attendance from 1931 to 1932 may be in part accounted for by the fact that the clinic was closed during the months of July and August, and many of the patients who were in active attendance up to that time transferred to other hospitals which maintained arthritic clinics through these months.

The total number of clinic days during this period was 81, making an average attendance during the entire year of 27 patients per day.

There was a marked decrease in attendance following the re-opening of the clinic in September and active effort was made to canvass patients on the files for follow-up and for re-examination. There was quite a healthy response to this canvass and we are pleased to report that the attendance is beginning to approach normality.

We regret that during the year Dr. William Ferderber, dental; Dr. Robert Lowrie, gynecological;

Dr. Alvin M. Street, oto-laryngological; and Drs. Margery C. Shearer and Clinton Gray, Medical, found it necessary to resign from the Service, but we are glad to report that their places have been adequately filled by Dr. A. M. Krieger, dental; Dr. C. N. Harper, oto-laryngological; Dr. W. M. Weeden, gynecological, and Drs. N. W. Osher and Carl A. Zoll, Medical.

We feel that the personnel of the Arthritis Clinic as it stands is excellent and that we will achieve even greater efficiency and closer cooperation than we have had in the past. We are pleased to report excellent cooperation between other departments of the Hospital and this clinic, and look forward to even closer entente in 1933.

The Arthritis Department is carrying on researches in drug therapy as applied to the arthritic problem and intend to carry on researches in other directions during the forthcoming year. These researches will be reported in the literature in due time.

We are somewhat handicapped by the lack of facilities in some of the departments. The efficiency of the clinic would be greatly enhanced by a diathermy apparatus which can be utilized both for work in local surgery by the Oto-laryngological, Gynecological, Urological and Proctological departments. The Oto-laryngological department needs more instruments, although we are getting along fairly well with the apparatus at hand.

We are very much interested in the establishment of an X-ray Therapeutic Department in connection with our clinic, as a number of favorable reports have been received from Europe on the results obtained by this method of treatment in chronic arthritis. Very little of this type of work has been done in this country although it has been extensively utilized in Europe for the past five years.

Through the cooperation of Mr. Flick and Dr.

William B. Coley, a room has been assigned to us for this purpose and all arrangements have been made for instituting this line of treatment. Not wishing to burden the Hospital with any increased demands, we have been making an effort to obtain a special fund for the purpose of purchasing X-ray equipment and paying for the installation. Up to the present we have not been successful but we have been given reason to believe that the money will be made available before long.

With the cooperation of Dr. Hansson, chief of the Physiotherapy Service we intend to carry out treatment of several of the severer cases of chronic arthritis with the new so-called Fever Therapy Apparatus. This form of artificial induction of fever for relief of chronic arthritic symptoms is still in its experimental stage and we are very anxious to carry out this type of therapy to determine just what value this treatment has in the approach to the arthritic problem.

The work of the clinic was recognized in a very practical way by the American Committee for the Study of Rheumatic Diseases during the past year, as our staff was asked to read one paper and discuss two at the first meeting of the arthritis specialists that has ever been held in this country in connection with the American Medical Association meeting which took place in May at New Orleans. At that time it was decided that the Committee would meet and present papers each year at the Annual Meeting of the American Medical Association, and one of the members of our staff was again asked to read a paper at the meeting this coming year.

In summary, we are pleased to report definite progress for the period covered by this report and are looking forward to a better year in 1933.

Respectfully submitted,

R. G. SNYDER,  
*Director of Clinic.*

# PHYSICAL THERAPY DEPARTMENT

## ANNUAL REPORT FOR 1932

A total number of 58,137 treatments were given. These were distributed as follows:

<i>Month</i>	<i>O.P.D.</i>	<i>Ward</i>	<i>Private</i>	<i>Comp.</i>	<i>Employees</i>	<i>Total</i>
January .....	4,766	560	259	355	50	5,990
February .....	4,204	648	185	307	28	5,372
March .....	4,373	441	209	347	59	5,429
April .....	4,638	439	264	218	41	5,600
May .....	4,547	467	241	291	6	5,552
June .....	4,171	417	169	388	11	5,156
July .....	2,784	262	199	423	54	3,722
August .....	3,023	223	172	516	58	3,992
September .....	3,171	128	259	378	46	3,982
October .....	3,659	276	193	380	85	4,593
November .....	3,565	256	152	363	84	4,420
December .....	3,581	243	144	297	64	4,329
	46,482	4,360	2,446	4,263	586	58,137

9,234 treatments were free. In the night clinic 5,977 treatments were given.

This is the ninth year that this department has been in operation, it is a pleasure to report the ever-increasing use of physical therapy in an orthopedic hospital. It is difficult to visualize the complete recovery of an orthopedic patient without the corrective gymnasium or the therapeutic pool. The benefits of light energies are used in ever-increasing number of pathologies interfering with a child's normal growth. The treatment of arthritis has always been associated with thermal, mechanical and hydrotherapeutic measures.

The upkeep of a large department like ours is an expensive one and the great number of free treatments extended to the needy patients is a great credit to the hospital administration, especially under present economic crisis.

Respectfully submitted,

K. G. HANSSON, M.D.

## OBESITY CLINIC

DR. FRANK G. PETTENGILL

The Obesity Clinic has been in existence for a little over a year and during that period 440 new cases have been admitted. The total number of revisits were 1,008. The majority of these cases have been referred from the Orthopedic, Physiotherapy or Arthritis Departments. Each patient has a complete history taken, a basal metabolism and urinalysis done before coming to the examining physician. The physical examination is done at the first clinic visit. This is followed by a half hour talk and instructions in dietary regulations. Patients return in one week and if reductions are satisfactory they are either allowed to go for two weeks or a month interval.

In the first few months the Clinic met only on Thursday morning, but because of increased demands a Tuesday evening session has been added. In conjunction with diet and whatever glandular therapy is indicated, there has been started two classes in the gymnasium, under Dr. Hansson, in which careful instruction in body exercise is taught.

It is interesting to note that the age group varies widely. Cases as young as 3 years have been admitted and adults up to 65 years. Reduction has been accomplished successfully in a large number of cases.

The Clinic is self-supporting. The average attendance being about 11 cases. It is probable that in the near future an assistant doctor will be required and also a trained dietician. The latter to do the detail work in arranging the individual menus.

# REPORT OF THE TREASURER

### THE ALKER MEMORIAL LIBRARY

Founded by MR. HENRY A. ALKER in Memory of His Mother

The Library was founded by Mr. Alker to provide books for the patients in the Hospital. It has been the source of great enjoyment to many of our patients. Mr. Alker has continued to provide new books each year.

We are very grateful to Mr. Alker for his generosity.

## GIBNEY PAVILION FOR PRIVATE PATIENTS

The private pavilion was opened on March 15, 1923. It offers the patient every possible comfort and advantage.

The prices of the rooms range from \$6.00 to \$12.00 per day, payable one week in advance. Semi-private rooms on the Pavilion are \$6.00 per day. Semi-private rooms off the Pavilion are \$5.00 per day. These rates include board, ordinary nursing, medicines and dressings.

Special (Graduate) nurses may be had on request at the rate of \$6.00 for eight hours duty, making 3 specials to cover 24 hours \$18.00.

For extra dressings and medicines, for all X-rays, braces, physical therapy treatments, apparatus and laboratory service a charge is made accordingly. The use of the operating room is \$20.00. Doctors' fees are not included in the hospital bills.

Each room is provided with a telephone. Ten cents is charged for all local calls, long distance calls per telephone company rates.

If a patient wishes to have a member of the family stay at the hospital, a cot will be placed in the room at an additional charge of \$2.00 per day and \$3.00 per day for meals.

A safe is provided in the main office for valuables. The management is not responsible for valuables left in the rooms of the patients.

Visiting is allowed from 9 A.M. to 9 P.M.

Checks should be made payable to the order of the Gibney Pavilion.

## CONTRIBUTORS TO THE SUPPORT OF THE INSTITUTION

### *Annual Member*

Each annual contributor of ten dollars and upward shall be entitled to recommend a child to the out-door patient department.

### *Annual Donor*

Each contributor of fifty dollars and upward, at one time, shall have for life the privilege of an annual member.

### *Patron of the Society*

Each contributor of five hundred dollars and upward, at one time, shall be denominated a Patron of the Society. The payment of five hundred dollars entitles the contributor to the treatment of an indigent child in the Hospital for the year or such patient for every five hundred dollars paid to the institution.

### FREE BEDS

1. A donation of three thousand dollars shall entitle the donor, during life, to place a child in the Hospital for treatment and when such child is removed to place another in its stead.

2. A donation or bequest of seven thousand five hundred dollars shall entitle the giver (as soon as the money is received) to the above rights in perpetuity, the rights to be transmitted in writing or by will, otherwise to cease.

### FREE BEDS

GIFFORD, MRS. ELLEN M.

KNIGHT, in memory of JAS. KNIGHT, M.D.

BLISS, GEORGE, in memory of his daughter.

FRASER, MRS. ANNA M., in memory of her father and mother,  
HANSON K. and EMMA B. CORNING.

## SOCIAL SERVICE DEPARTMENT

### REPORT OF THE CHAIRMAN

The work of the Social Service Department has greatly increased as shown in the following detailed report. We have been obliged to continue our assistance to the families of our patients.

We are greatly indebted to:

The Children's Fresh Air Home, Southampton, N. Y.

Friendship Hall, Rhinebeck, N. Y.

Mr. and Mrs. Gates McGarrah.

The Society for the Aid of Crippled Children.

The Lillian Block Schwarz Happiness Fund.

The Junior League Clothing Center.

The Volunteers in the Clinic and to the other organizations, agencies and individuals for their generous aid.

During the past year one member of our Committee has regularly attended meetings of the Junior League Clothing Center and another has organized the work of the volunteers in the clinic.

The greater demands upon our funds, due to the present economic condition led to the organization of two most successful Bridge Parties in the Hospital Solarium. We are most grateful to those who contributed to our annual dollar appeal and to all those whose generosity and interest has made our work possible.

The Committee wishes to express its sincere appreciation to the members of the Social Service Staff for the tremendous amount of work they accomplished while co-operating with the hospital's plan of general reduction.

The value of our work could be immeasurably increased if we had a year-round country home where we could send our very handicapped children.

The Committee deeply appreciates the most generous co-operation of the Superintendent, the Officers of the Hospital and the Doctors and Nurses.

Respectfully submitted,

ALIDA CARTER AGAR.

MRS. JOHN SISE	
MRS. A. PHILIPPE VON HEMERT	

## REPORT OF THE OCCUPATIONAL THERAPY DEPARTMENT

FOR THE YEAR, 1932

The work of the Occupational Therapy Department has continued with satisfactory results throughout the past year. Our entire committee has taken an active part in the work but it is to the two loyal and splendid Occupational Therapy workers, Miss Eunice Weber, and Miss Elizabeth Richmond, that the credit is due. Under the direction of Dr. K. G. Hansson, as medical adviser, they have placed a growing emphasis on the curative side of the work. We hope to be able, with moving picture films and other means to make several reports in the coming year on cases definitely helped by the department's work.

Craft's Committee: Miss Leila Delano, chairman, reports that during the year 1932, 686 patients were treated in the department, completing 23,578 hours of work and 634 articles. Whereas the proportion of articles to patient is smaller than in previous years we have thought it better for our department to make articles which are easily sold as a large percent of our income is derived from these sales. Miss Delano has working under her Mrs. Richard McClenahan, Mrs. John Pennypacker, Mrs. Ludlow Bull. They have helped regularly in preparing the work for the patients thus enabling Miss Weber and Miss Richmond to give more of their time in the wards and to more closely supervise the work done in the shops.

The Buying Committee: headed by Mrs. Lloyd Sanderson, Jr., has been able to do the entire buying for the department except during the summer months when our workers took it over themselves. There is usually very little to buy during the summer and Miss Weber feels that they can easily take care of it.

There has been a new committee created, that of

therapeutics. Mrs. Philippe von Hemert has undertaken to investigate the best possible means of checking and reporting on the patients, and to see whether the out patients returning to the hospital for treatment cannot benefit more by our department than in the past.

Library Committee: It was with great regret that the committee accepted Mrs. Paul Colonna's resignation as chairman of the library last spring. We feel that under her excellent direction for the last two years, that the library has been organized and is running in perfect order and that it was mainly through her loyal support that this was accomplished. Mrs. John Rutherford has taken her place as chairman and is continuing the policy of sorting out duplicate volumes to give to other hospital libraries, and of purchasing current novels when able, to augment our donations. Formally we have had a paid librarian two mornings a week. This fall through the Junior League we have secured the services of an excellently trained volunteer, Miss deGaugue who is working splendidly. She assists in taking the books through the wards, and does the cataloguing. We have approximately 3,000 volumes on the shelves.

This year we have received about 600 donations.

The treasurer's report is enclosed separately.

The committee is greatly encouraged with the fine interest shown by the hospital staff in the department. It is our hope that we can increase our usefulness and service to the hospital.

Respectfully, submitted,

MRS. ELI WHITNEY DEBEVOISE,

*Chairman.*
